CRD Notice: 13-02

NOTICE OF INTENT TO PURCHASE TRIPLOID, EYED OYSTER LARVAE FOR THE 2013 REPLENISHMENT PROGRAM

NOTICE is hereby given that the Virginia Marine Resources Commission (VMRC) intends to contract for up to 2.0 billion hatchery produced triploid, eyed oyster larvae. During periods of time when triploid, eyed oyster larvae are not available for purchase, VMRC will purchase diploid, eyed oyster larvae from disease-resistant (DR) stocks of oysters. These larvae will be produced and delivered to spat on shell setting stations around the Chesapeake Bay.

THE COMMISSION RESERVES THE RIGHT TO MAKE CHANGES IN THE PROGRAM AT ANY TIME.

GENERAL:

Oyster broodstock will be provided to the contracted hatcheries by the Virginia Institute of Marine Science (VIMS).

Eyed oyster larvae will be produced and delivered to spat on shell setting stations between April 1, 2013 and September 15, 2013.

Generally, eyed oyster larvae will be delivered in lots of 7 to 21 million.

VMRC personnel will document the delivery of eyed oyster larvae to the setting stations.

The price per million for triploid, eyed oyster larvae delivered to the remote setting station will be \$275.00. The price per million for diploid, disease-resistant, eyed oyster larvae delivered to the remote setting station will be \$210.00.

Larvae will be delivered in lots of 7 – 21 million. Hatchery contractors may supply from one to 100 lots. Payment to the contractor shall be made after the delivery of the larvae to the setting locations.

Upon receipt of proper documentation by the Conservation and Replenishment office, and verification of registration with the Virginia Department of Minority Business Enterprises, as a small, woman, or minority owned company, payment will be made to the contractor within 15 days. Before any payments can be made, a contract and current Tax form (W-9) will have to be completed and on file at the Marine Resources Commission main office. Checks will be forwarded to the contractor by mail.

The Marine Resources Commission will provide all contractors with information, so that they, if not already registered, can promptly register as a small, woman, or minority owned company with the Virginia Department of Minority Business Enterprises.

Hatcheries interested in providing the eyed oyster larvae should provide, in writing to the

Conservation and Replenishment Department the number of lots of 7 – 21 million larvae that they could provide. To participate, a hatchery must have a documented history of commercial production of shellfish larvae or seed for the Chesapeake Bay. Hatcheries interested in providing the eyed oyster larvae must provide a written description of their facilities and experience in commercial production of shellfish. If more than one (1) hatchery expresses a desire to participate and are qualified, the total quantity may be divided among those expressing written interest in the project in accordance with their capabilities.

RESPONSE DEADLINE:

Persons interested in participating in this project should submit their written response to the Conservation and Replenishment Department, at the main office either by mail, fax, or e-mail, no later than 12 Noon, Friday, March 22, 2013.
